

## Responsibility contract for access to the Stockholm Makerspace

- **I am aware that everything I do on the premises is under my own responsibility.**

### I pledge to ...

- take responsibility for my own actions and to show consideration for other members.
- not do anything illegal on the premises.
- abstain from using drugs or alcohol on the premises.
- not operate the group's machines under the influence.
- keep myself updated on the latest rules.
- find and follow space/machine-specific rules.
- always clean up after myself and leave the premises in a clean state.
- ask a Board member if I'm unsure about something.
- always ask before photographing people or other people's projects located on the premises.
- not engage in commercial activities on the premises.
- not sleep on the premises.
- retrieve my stored project materials within 45 days from my lab membership expiration. After this time period, any remaining materials belong to the Stockholm Makerspace.
- take full responsibility for what my guests do on the premises. A guest is only allowed on the premises with the intention of showing them the space and activities. They must not work with their own project during their visit.
- always leave the kitchen/common spaces in better shape than I found them. This is especially important with spaces shared with other building occupants and we risk losing access to these places if this privilege is abused.
- report lost keys to the Board immediately after a loss.
- report damage to the machines/premises to the Board immediately after discovery.
- take responsibility for the people I let on the premises. Do not let in anybody you do not know!

**I understand that if I violate any of the rules above or otherwise abuse my access to the premises, I can be banned from the premises without a refund of my lab fee.**

**I will do my best to ensure that the Stockholm Makerspace is a clean, safe and welcoming place.**
